

WE'RE HIRING... QUALIFIED BOILER MAKERS

Qld Lifestyle Trades

It's not that long ago that a trade was not just your meal ticket, but your ticket to see the world – or at least, your country! So, just imagine living and working in one of the country's most sought-after locations: where the resources boom meets the most incredible tourism attractions, in a vibrant young-at-heart community that sits right in the middle of the Sunshine State.

Kynaston Engineering is a machining and fabrication company located in Mackay and we are looking for motivated, career-driven and experienced Boiler Makers.

If this sounds like a sweet gig, and you like the idea of living equal-distance between Brisbane and The Daintree, with the reef and the outback just a stone's throw away, then this might be for you.

You'll need:

- To be able to complete all fabricating and trade requirements, with extensive jobbing and workshop experience
- The ability to proficiently operate Mig, Tig and Stick welders and machines; using all associated tooling in a timely and efficient manner
- To be able to provide timely and accurate documentation and show an ability to clearly communicate with other members of the crew
- A commitment to ensuring all safety, quality, and environmental practices are managed and standards exceeded
- An understanding of safe operating procedures for all workshop gear
- An ability to read and interpret drawings, stays, weld symbols and documentation such as procedure manuals, safety rules, and operating and maintenance instructions.
- Current Trade Certificates (which goes without saying, but you know we will need to see them!)
- A Current C-Class Driver's Licence
- A Forklift certificate and crane ticket would give you an edge as well.
- All the other usual things: Initiative, a solid work ethic, attention to detail, pride in your work, the ability to read a clock so you turn up on time, the ability to work autonomously as well as a member of a team and a well-presented, good-natured disposition helps too.

Like what you read? Apply.

We offer a remuneration package around the \$110K mark. That is market-competitive and includes your base, some overtime, annual leave loading, sick pay. A relocation/settling package could apply to successful applicants, but there are some conditions attached to relocation so we will discuss that if you get an interview.

All this comes with the added bonus of being on the doorstep of the best fishing, diving, hang-gliding, adventure sports, photography and bushwalking locations in the country. There's also plenty of places which do a great steak, make excellent coffee and have cold beers from the world-over on tap.

And, we know with these kinds of jobs, you're generally here for a good time, not a long time, so we would love nothing more than to give you industry-best training and experience for a couple of years as a stepping stone to bigger and better things.

WHAT HAVE YOU GOT TO LOSE?
EMAIL APPLICATIONS, WITH A COVER LETTER AND CV,
DIRECTLY TO THE BOSS, ROBBIE YOUNG:
ROBBIE@KYNASTONENGINEERING.COM.AU.

APPLICATIONS CLOSE MARCH 23, 2018.
